Welcome to the Delphos Country Club Newsletter

Mike Fast Note

July has presented significant challenges, with 13 days exceeding 90 degrees Fahrenheit and humidity levels that result in heat indices above 100 degrees. Along with record rainfall for the month, these conditions have led to accelerated turf growth and heightened disease pressure.

Despite maintaining consistent mowing frequency and height on the greens, rapid growth continues to result in slower green speeds. I'm waiting for those days in the 70s with lower humidity; in which, we can do some cultural practices to speed up the greens. I can't stress enough the importance of fixing your ball marks on the greens and replacing your divots with either the divot or sand. This will vastly improve our golf course!

~Thanks, Mike Fast

A Note From Your Pro

I'm sure you all have noticed the new Sand Bottle stations on the golf course, like the one pictured below. This station is for walkers only, if they forgot to grab a bottle, when they tee off of #1 and #10. Cart riders, please do not leave your bottle here as they do not have slots in the rack to accommodate the bottles we use in carts. We have cans of sand by the water coolers on hole #5 and #16. Please use that sand.

Thank you

~Your Pro, Trevor
